

2025 ENVIRONMENTAL STEWARDSHIP AWARD

NOMINATION PACKET

**ENVIRONMENTAL
STEWARDSHIP
AWARD**

AWARD PROGRAM

For centuries, cattle producers have had a personal relationship with the nation’s land and resources. They have assumed the responsibilities and risks of investing their lives to protect and conserve the environment. Producers depend on the land and its resources for their livelihood. Therefore, good management practices ensures their well-being and the longevity of their operation for future generations.

Cattle producers, as individuals and as an industry, are actively working to protect and improve the environment because they know environmental stewardship and good business go hand-in-hand.

Since 1991, the Environmental Stewardship Award annually recognizes outstanding stewardship practices and conservation achievements of U.S. cattle producers. Regional and national award winners have been commended for their commitment to protecting the environment and improving fish and wildlife habitats while operating profitable cattle operations.

Environmental Stewardship Award winners share a common desire for leaving the land in better condition than they found it in hopes of inspiring the next generation of land stewards. While the program highlights stewardship, it also

provides fellow cattle producers with examples and ideas of management practices, which may be useful on their own farming and ranch operations.

The Environmental Stewardship Award is an initiative of the National Cattlemen’s Beef Association and the National Cattlemen’s Foundation and is funded by Corteva Agriscience, the USDA Natural Resources Conservation Service (NRCS), and the U.S. Fish and Wildlife Service.

Award winners are selected annually by a committee of representatives from universities, conservation organizations, cattle producers, federal and state agencies. For guidance, the judges consider the management of water, wildlife, vegetation, air, and soil, along with leadership abilities and the sustainability of the business as a whole.

Nominations can be submitted by any organization, group or individual on behalf of a U.S. cattle producer. In the past, nominations have been submitted by a diverse mix of organizations. A partial list includes: The Nature Conservancy, NRCS, Society for Range Management, state game and parks services, state extension services, universities, wildlife organizations, and livestock groups.

AWARD TIMELINE AND EVENTS

APPLICATIONS DUE: FEBRUARY 17, 2025

- **March/April 2025:** The Selection Committee meets to determine the 2025 regional winners. These winners are personally notified shortly thereafter but are not publicly announced.
- **June 2025:** The video crew begins to visit each of the 2025 regional winners’ operations.
- **February 2026:** All regional winners from 2025 are expected to attend the 2026 Cattle Industry Convention in Nashville, TN. Travel and registration will be paid for by the Environmental Stewardship Award for two people.

“Caretakers of the Land” bronze gifted to National winner.

APPLICATION GUIDE

YOUR 2025 AWARD APPLICATION SHOULD INCLUDE THE FOLLOWING COMPONENTS:

(Sections I-IV should not exceed 12 pages total)

SECTION I – HISTORY AND DESCRIPTION OF BUSINESS AND ECOLOGICAL CONTEXT

Please identify the name of the business, the individual(s) to be recognized, address, primary contact, website, phone/fax/email and a map indicating where the operation is located within the state. This section should provide a brief description of the operation's history, business model and ecological setting. What sector(s) of the cattle industry are primary (cow/calf, stocker, etc.)? What other enterprises are associated with the cattle operation? What are the primary ecological features of the landscape (e.g. notable watersheds, geology, topography, climatic zones, water bodies, dominant wildlife species, urban/suburban interfaces and the like)? What natural resources (e.g. mining, hunting/fishing, oil/gas, timber) contribute significantly to the operation's revenue streams? How big are the parcels of land? How much land is owned, leased (federal or otherwise)? How many beef units are raised on the operation? What is the operation's history of ownership and business structure?

SECTION II – TELL THE STORY: SUSTAINABILITY ON THE GROUND

This is the most important section of the application. It should present—in a logical, systematic way—the form that “sustainability” takes in the operation's unique ecological, economic, social and regulatory settings. What are the applicants trying to achieve and why? How successful have they been? To what, as it relates to their cattle operation, do they owe their success? The suggested outline that follows is intended to help the nominator organize their presentation of the relevant information in a way that embodies the candidate's thoughtful, coherent, practical strategy for achieving long-term sustainability as it relates to their cattle operations.

AREAS OF FOCUS:

Regulatory Context/Setting — Federal, State and/or Municipal Requirements

Are there specific regulatory requirements that apply to the operations as a whole, or any of its significant components? Examples would include NPDES (National Pollutant Discharge Elimination System) or state water permits, endangered-species limitations, state-designated water-quality stream segments, TMDLs (Total Maximum Daily Loads), air-pollution non-attainment status and the like. Identify them and explain how they affect the operation's strategic objectives.

Special Challenges and/or Opportunities

What are the specific challenges and opportunities that the landscape poses for the beef operation and its viability? Examples of resource challenges and opportunities might include groundwater or surface water supply and quality; riparian restoration; native plants, fish and wildlife; invasive species; erodible soils; use of recycled materials; innovations created to protect or enhance natural resources; encroaching land development; reclamation needs; etc. How do these conditions affect the range of tactics, strategies and financial resources that are available to the candidate? What is required to protect or enhance the ranch's environmental conditions and natural resources?

Environmental, Economic, Resource-Management, and Sustainability Goals

In consideration of the beef operation's ecological and regulatory settings, unique environmental or natural resource challenges, and special environmental opportunities, what are the candidate's primary goals?

Environmental and resource-conservation goals must be included here, but economic goals that play a vital role in making the environmental goals a practical possibility should also be described.

Partnerships, Strategies, Tactics and Practices

What did the candidate do to pursue the goals outlined in the previous section? Did the candidate enter into any substantial partnerships or land-management arrangements? Did the candidate enter into any cost-share or incentive programs with agencies or foundations? What educational and/or technical assistance resources did the candidate draw upon for help? What specific practices, structure, and/or management changes did the candidate put in place (e.g. grazing practices, erosion controls, pest management, fish and wildlife habitat enhancement, riparian restoration, etc.) that helped to achieve the operation's sustainability goals?

Outcomes and Accomplishments—Benchmarks, Data, Before/After Images, Documenting Success

To the greatest extent possible, document the success the operation has had in achieving its sustainability goals. Are there any measurable results? For example, has water or air quality improved? Have endangered-species populations rebounded? Has wildlife harvest, quality, or diversity improved? Does the operation use less (energy, water, imported nutrients) per unit at marketed beef? Are profit margins improving? If appropriate and credible, include any monitoring data, research data, survey data, or photographic evidence that clearly illustrates the operation's progress toward achieving its sustainable objectives.

APPLICATION GUIDE

SECTION III – SHARING YOUR ENVIRONMENTAL SUSTAINABILITY STORY (200 words maximum)

This is an opportunity to put environmental sustainability in terms that the consuming public will understand and appreciate. What is unique about the operations’s strategies, tactics or successes that will appeal to the average consumer’s understanding of sustainable beef production? Why should anyone care what the candidate is doing to protect and enhance the environment and natural resources in the surrounding landscape?

SECTION IV – LEADERSHIP IN CONSERVATION WITHIN THE COMMUNITY AND THE INDUSTRY

Regional and national winners will become spokespeople for the beef industry, carrying forth the message that cattle producers are committed to good stewardship of the land and to the principles of long-term sustainability. How has the candidate demonstrated the drive and the ability to communicate that message to a sometimes skeptical public? What leadership has the candidate demonstrated that illustrates an ability to persuade fellow cattle producers to pursue environmental sustainability as a primary business objective? How well would the candidate serve as a spokesperson for the beef industry? How involved is the candidate in the state or national organization?

SECTION V – LETTERS OF RECOMMENDATION/LETTER OF SUPPORT (8 pages maximum)

No more than three letters of recommendation should be included here. These letters should emphasize the nominee’s leadership in conservation, land stewardship and sustainability. Recommendation letters can come from fellow cattle producers, local or state organizations, foundations, national organizations, neighbors, friends, biologists, other conservationists, etc. Each letter should be no longer than two pages.

In addition to recommendation letters, each applicant should submit a nomination letter or letter of support. This letter can be prepared by the individual or organization that nominated the applicant.

Application Technical Guidelines

There is a 20-page limit for the nomination packet that includes:

- 12 pages for the application
- 2 pages for each letter of recommendation (total of 6 pages)
- 2 pages for the nomination letter.
- Attach signed Statement of Authenticity

Please submit electronically. Your applications will be printed on an in-house color printer.

Electronic applications are preferred and a complete PDF document is suggested with all the pieces compiled in a single document.

Please do not send nominations in notebooks or binders. Please keep your font size at 12 points. A sample of a winning application from previous years can be found online at www.EnvironmentalStewardship.org.

Completed application must be emailed to the contact below or postmarked by February 17, 2025 and sent to:

**National Cattlemen’s Foundation
Environmental Stewardship Award
9110 E. Nichols Ave., Suite 300
Centennial, CO 80112
303-850-3378 • esap@beef.org**

NOMINATION AND SELECTION PROCESS

THE APPLICATIONS WILL BE JUDGED ON THE FOLLOWING CRITERIA:

- Environmental Stewardship Practices, Accomplishments, and Goals
- Local, Regional and National Leadership Activities that Improve Conservation, Stewardship and Perception of the Cattle Industry
- Endorsements from Cattle Groups, Conservation Organizations and/or Government Agencies
- Sustainability of the Operation and Economic Viability

Applications for the 2025 Environmental Stewardship Award are due February 17, 2025. Any individual, group or organization is eligible to nominate one individual/business who raises or feeds cattle. Individuals and families may not nominate themselves. However, we expect nominees will be involved in the preparation of the application.

Past nominees are encouraged to resubmit their application. Previous regional winners may not reapply.

The full nomination application and directions for its completion are enclosed in this packet. Along with the typed application, one nomination letter and three letters of recommendation highlighting the nominee's leadership in conservation are expected. Nominees do not have to be members of NCBA but should support the objectives of their state and national organization. National membership is strongly encouraged.

PAST WINNERS

- 1991 -

I
Don Duff
Chavies, KY

II
Adams Ranch
Mike Adms
Fort Piecre, FL

III
Littrell Farms
Terry Littrell
Thompson, MO

IV
Spur Headquarters Ranch
O.J. Barron, III
Spur, TX

V
Pitchfork Ranch Co.
Jack Turnell
Meeteetse, WY

VI
Canyon Creek Ranch
Robert H. Mackey and Son
Alturas, CA

VII
Grant Country Feeders
Marc Roth
Ulysses, KS

- 1992 -

I
Waffle Hill Farm
Churchville, MD

II
Crescent B Ranch
Punta Gorda, FL

III
Gerard Farms
Spring Grove, MN

IV
Mulshoe Ranch LTD
Gail, TX

V

SPONSORS

CORTEVA
AGRISCIENCE
Corteva Agriscience™ has

sponsored the Environmental Stewardship Awards Program for more than 30 years. Corteva, the only pure play agriculture company headquartered in the United States, is the industry leading provider of weed protection solutions. Cattle producers rely on Corteva for best-in-class pasture solutions including DuraCor®, GrazonNext® HL, PastureGard® HL, Remedy® brands, many other herbicides and the first ranch focused digital solution to provide customer decision making tools to control brush, LandVisor™ Advanced Brush Management.

With a dedicated team specializing in Range and Pasture Management, producers get the expertise they need in a partner, leading products, a robust pipeline and superb custom services. Visit RangeAndPasture.com for more information including a complete list of range and pasture solutions.

NATURAL RESOURCES CONSERVATION SERVICE (NRCS)
Since 1935, the USDA Natural Resources Conservation Service has delivered

conservation solutions so agricultural producers can protect natural resources and feed a growing world. Our vision is a world of clean and abundant water, healthy soils, resilient landscapes and thriving agricultural communities through voluntary conservation. NRCS is helping private landowners improve the health of their operations while protecting our natural resources for the future and ensuring the long-term sustainability of American agriculture. NRCS employees provide sound, science-based on the ground technical assistance tailored to farmers' and ranchers' specific needs. Participation in NRCS conservation programs and initiatives is voluntary. The USDA is an equal opportunity provider, employer and lender. For more information visit www.nrcs.usda.gov • www.usda.gov

National Cattlemen's Beef Association

NATIONAL CATTLEMEN'S BEEF ASSOCIATION
The National Cattlemen's Beef Association (NCBA) is the largest national organization representing America's cattle industry. Founded in 1898, NCBA is the industry leader in education,

advocating for cattle and beef producers and preserving the industry's heritage and future. Efforts are made possible through membership contributions. To join, contact NCBA at 1-866-BEEF-USA or membership@beef.org. NCBA promotes common sense and cost-effective practices that can be applied to livestock production to benefit the environment and a healthy bottom line. For more than two decades, NCBA has worked to recognize outstanding stewards of our nation's land, air and water resources through the Environmental Stewardship Award Program. For more information about NCBA please visit NCBA.org.

National Cattlemen's Foundation

NATIONAL CATTLEMEN'S FOUNDATION
The National Cattlemen's Foundation advances the

future of the beef industry with passion and urgency. The Foundation provides educational opportunities, scholarships, and a home for the National Cattlemen's Beef Association's Environmental Stewardship Awards Program. For information about the National Cattlemen's Foundation a 501(c)(3) organization, visit NationalCattlemensFoundation.org, call 303-694-0305 or email ncf@beef.org.
